

Pawan Tailor

Senior Technical Writer | User Guides, Help Documentation & Release Notes | Documentation Strategy & Ownership

Surat, Gujarat, India | pawantaylor18@gmail.com | +91 8530074250

PROFESSIONAL SUMMARY

Senior Technical Writer with **8+ years** of experience across **SaaS, Fintech, and Enterprise** products, writing **user guides, help manuals, release notes, and knowledge base** content. Comfortable stepping into undocumented or messy problem spaces and structuring them with little or no oversight. Has led **company-wide documentation strategy, a large-scale content migration, and an AI-assisted documentation rollout** spanning thousands of articles, always validating output rather than publishing it as-is. Experienced working independently across **distributed, global teams**.

TECHNICAL SKILLS

- **Core Skills:** Technical Writing, Documentation Strategy, Editing, Proofreading, Content Clarity & Consistency, Information Architecture, Content Governance, Knowledge Management
- **Documentation Tools:** Ixiasoft CCMS, Confluence, Zendesk, Salesforce Knowledge, Adobe FrameMaker, RoboHelp, MadCap Flare, ReadMe, MS Word, Google Docs
- **AI & Automation:** AI Positron Assistant, Claude, GitHub Copilot, ChatGPT, Prompt Engineering, AI-Assisted Documentation Review, Intelligent Review & Editing, Workflow Automation
- **Product & Process Collaboration:** Jira, Azure DevOps, Slack, MS Teams, Trello, Agile Workflows, Sprint Ceremonies, DSUs, Cross-Functional Collaboration
- **Content Management & Version Control:** Git, Bitbucket, SharePoint, WordPress, CMS Platforms, Documentation Migration, Structured Content, Single Sourcing
- **Authoring Standards:** DITA, XML, HTML, Markdown, Microsoft Style Guide, Chicago Manual of Style, IBM Style Guide
- **Product Knowledge:** Fintech, AI/ML, Observability Platforms, Contract Lifecycle Management (CLM), API Marketplaces, B2B SaaS, Membership & Association Software
- **Documentation Processes:** Release Cycle Documentation, Content Lifecycle Management, Review & Approval Workflows, Cross-Team Knowledge Alignment, Universal Documentation Strategy
- **Additional Skills:** API Documentation, Postman, Swagger, OpenAPI, Archbee, JSON, RESTful APIs, Developer Documentation, API Portals, Project Management, Testing & Validation, UX Writing, Stakeholder Management, QA Documentation, Product Improvement, Documentation Standardization, Canva, SnagIt, Camtasia, Adobe Creative Suite, MS Visio
- **Programming Fundamentals:** Python, Java, HTML, CSS, OOPs, DBMS

KEY PROJECTS

- **Universal Documentation Strategy:** Took the initiative to build a shared **documentation backbone** from scratch, bringing **19 products** under one consistent framework for **structure, style, and user experience**.
- **Cobalt-to-Salesforce Migration:** Took full **ownership** of moving **3,000+ articles** from **Zendesk** to **Salesforce Knowledge**, controlling for **content integrity** and **governance** throughout, not a simple lift-and-shift.
- **vuSmartMaps Documentation Roadmap:** Walked into an **observability** product with zero documentation, independently **researched** the system, then shaped the **roadmap** that kept content in step with every release.
- **AI-Assisted Documentation Overhaul:** Led Avalara's shift to **AI-assisted content review**, managing the rollout across **5 product documentation sets** and **1,000+ articles**, and driving team-wide adoption of the new workflow.
- **VuNet Content & Marketing Initiatives:** Went beyond standard technical writing on his own initiative, turning **observability** research into **blogs, videos, podcast content, and marketing visuals** for product positioning.

EXPERIENCE

Momentive Software

Senior Technical Writer, Pune

06/2025 - Present

- **Own documentation** for two flagship products, **Cobalt** and **NetForum**, delivering **release notes, help manuals, user guides, and customer-facing documentation** across the full **product lifecycle**.
- Spotted the need for a **Universal Documentation Strategy** and **built it from the ground up**, bringing **19 products** under one consistent standard.
- Planned and ran the **migration** of **3,000+ articles** from **Zendesk** to **Salesforce Knowledge**, maintaining **content continuity and governance** throughout.
- Set up **Copilot**, then **Claude**, with reference material, prior release notes, **Jira** tickets, and **Confluence** specs for upcoming releases, so it could produce a usable first draft, then **reviewed every draft** against stakeholder feedback and product accuracy before publishing.
- Sits in on **DSUs, sprint planning, and release readiness** with Product, Engineering, and QA; also started a **Regression Testing framework** to catch doc gaps before release.

Avalara

Technical Writer, Pune

07/2023 - 06/2025

- Wrote **connector integration guides**, **SI documents**, **release notes**, and **Knowledge Center articles** for Avalara's **tax compliance** products, often starting from incomplete source material.
- **Collaborated** with developers, product managers, and QA teams during release cycles to capture updates, **validate workflows**, and improve **self-service support**.
- Worked with product managers and customer success teams to shape and improve the **FAQ/Q&A** sections following product documentation, addressing real customer confusion points rather than guessing at them.
- **Led the rollout** of **AI Positron Assistant** inside **Ixiasoft CCMS** after leadership introduced **AI-assisted review** across all documentation, covering **5 product documentation sets (1,000+ articles)**, building **reusable AI actions** for grammar, style, and validation checks, and supporting other writers adopting the workflow.
- Turned to **ChatGPT** for **first-pass drafts** built from support tickets and demo video transcripts, then edited and validated each one against actual product behavior before publishing.
- Tracked **support ticket trends** and used them to guide documentation updates, cutting down repeat questions.

VuNet Systems

Technical Writer, Bengaluru

02/2019 - 07/2023

- Joined as part of the **first documentation team** at VuNet and helped **establish** the company's **style guides** and **documentation standards** from the ground up, work that shaped how every writer after us approached content.
- **Built documentation, user guides, and manuals from scratch** for complex **observability systems** that had none, learning the systems independently first.
- Kept documentation current with every release, working directly with **cross-functional teams** to get accurate information.
- Produced **workflow diagrams**, **demo videos**, and **instructional content** that helped new users get up to speed faster and supported internal adoption.
- **Supervised junior writers** as the team grew, sharing standards and reviewing their work for consistency.
- Researched emerging **observability trends** and turned that research into **blogs**, **videos**, **podcast content**, and **marketing visuals**, finding creative ways to package technical knowledge for product positioning.

Infosys

System Engineer Trainee, Mysore

08/2018 - 01/2019

- Completed foundational training in **Python**, **Java**, **HTML/CSS**, **OOPs**, and **DBMS** as part of Infosys's core software engineering curriculum.
- Built a working grounding in **software development fundamentals**, later useful for reading technical specs, working with engineering teams, and understanding product architecture from a writer's perspective.

EDUCATION

M.Tech — Sardar Vallabhbhai National Institute of Technology (SVNIT), Surat | 06/2018

B.E. — Government Engineering College (GEC), Surat | 05/2016
